Number of Staff Issuing Permits: 4

Does your State offer
Online Requests: Yes No

If yes what percentage
Of permits does your
System issue without
Your review? 98.75%

New Legislation:

Permitting System Updates: (Please include money or time saving changes)

- Develop a method for delivering load configuration and route information to external entities
- Refine current calculations and routing information to comply with current federal regulations
 - o Check weights for individual axles and for individual tandem axles as described in Fed rules and IVC
 - o The Bridge Office should investigate whether or not it is still necessary to put “no other truck” restrictions on structures over 300 feet.
 - o Prevent routing around stationary scales to avoid weighting
 - o Force own-powered to have their routes analyzed by the Bridge Analysis software but not be charged the superload fee
 - o Provide a way to notify a customer if there is a 5mph crawl on their route and route around if possible. If there is no other viable route, then ask the customer if they want to accept the route with the 5mph crawl (ISP escort required).
- Add barcode(s) to physical permit to enhance permit security

- Add ability to generate receipts for credit card purchases
- Develop a smart-phone aware browser interface
- Refine permit storage
- o Retain permits notes to customer when effective date is less than 24 hr notification
- Refine permit information display
- o Modify several reports
- o Modify some customer views
- o Modify some SuperLoad Tech views
- Replace Silverlight interface with updated .NET technology
- Update accounting to a transaction-based database
- Add interface for Bridge Office to enter manual structural analysis

Procedural Changes:

Special notes included on permits

Innovative or Special Initiatives:
